

# 目 次

## 1.3-GHz Superconducting Radio Frequency Cavity Materials and their Evaluation

1	International Linear Collider .....	9-1-1
2	1.3-GHz SRF Cavities .....	9-1-2
2.1	Tesla cavities .....	9-1-2
2.2	Tesla-like cavities .....	9-1-3
3	Materials for SRF Cavity Assembly .....	9-1-3
3.1	Niobium (1.3 GHz SRF Cavity) .....	9-1-3
3.2	Mining of Niobium .....	9-1-3
3.3	Purification of Niobium .....	9-1-4
3.4	Post-purification .....	9-1-5
3.5	Various Grade of Niobium .....	9-1-6
3.6	Titanium .....	9-1-8
3.7	NbTi Alloy .....	9-1-9
4	Pressure Vessel Compliance for SRF cavities .....	9-1-9
5	Methodology to Evaluate Mechanical Properties .....	9-1-10
5.1	Why mechanical properties are important? .....	9-1-10
5.2	Methodology .....	9-1-10
5.3	Instrumentation .....	9-1-11
5.4	Tensile testing .....	9-1-16
6	Mechanical Properties .....	9-1-17
6.1	Niobium .....	9-1-17
6.2	Titanium .....	9-1-20
6.3	Nb-Ti Alloy .....	9-1-22
7	Recent Developments in Niobium Material Technology .....	9-1-23
	REFERENCES .....	9-1-23
